## It's Time to FeED the Mums!

- Exclusive FeED iron chelate system
- Potentially acidic fertilizer to prevent pH rise in the growing medium
- Additional iron, magnesium and sulfur for improved greening.
- 57% Nitrate - 43% Ammoniacal Nitrogen system.
- Higher nitrogen content means you use less fertilizer.

Size Available: 25lb. Bag

Mums are heavy feeders that respond well to additional magnesium, sulfur and iron. Many times though the iron becomes unavailable as the pH rises. The elevated iron levels found in the exclusive FeED Iron Chelate system keeps iron available to the plant even if the pH rises during the crop cycle. The additional 2% Nitrogen in this formula reduces your fertilizer usage by approximately 10%, making this product not only nutritionally effective, but cost effective as well!
